Journal of Developmental Physiology

VOLUME 6, 1984

EDITED BY
Colin T. Jones

OXFORD UNIVERSITY PRESS

Journal of Developmental Physiology, 1984, **6**, ii–v

Contents

Number 1, February 1984

A brief review of fetal renal function
Eugenie R. Lumbers 1

The fetal circulation and its response to stress
A. M. Rudolph 11

Preparation of the respiratory system for the early neonatal period
J. E. Maloney 21

Control of uterine acivity in the sheep
G. D. Thorburn, R. Harding, G. Jenkin, H. Parkington & J. N. Sigger 31

Development of the blood-brain barrier
N. R. Saunders and K. Møllgard 45

Fetal calcium homeostasis
A. D. Care & R. Ross 59

Fetal lung development
Joseph A. Kitterman 67

Regulation of breathing rhythm in the newborn. The role of brainstem immaturity and inhibition
D. J. Henderson-Smart 83

Activation of fetal adrenal function
J. R. G. Challis, B. F. Mitchell & S. J. Lye 93

The mechanism(s) of human parturition
Murray D. Mitchell 106

Number 2, April 1984

Non-steady state placental transfer of highly diffusible molecules
Randall B. Wilkening, Raymond D. Gilbert & Gordon G. Power 121

Urininary and hemodynamic responses to blood volume changes in fetal sheep
Hobe Schroder, Raymond D. Gilbert & Gordon G. Power 131

Contribution of circulating maternal lipids to fetal tissues in the guinea pig
C. R. Thomas & C. Lowy 143

The effect of maternal diet on maternal and fetal hepatic and brown adipose tissue lipogenesis and blood and tissue metabolites
Frank C. Higham, Deenan Pillay & Ernest Bailey 153

Studies on the characterization of bovine adipocyte precursor cells and their differentiation *in vitro* using an indirect-labelled-second-antibody cellular immunoassay
Anthony Cryer, Barbara R. Gray & J. Stuart Woodhead 159

Fetal blood and tissue PO_2 during maternal oxygen breathing
M. E. Towell, J. Johnson, K. Smedstad, M. Andrew & T.-L. Vu 177

Number 3, June 1983

The behavioural state in human perinatal life
P. Casaer & H. Devlieger 187

Classical and 'new' neurotransmitters during development – some examples from control of respiration
H. Lagercrantz 195

Arousal responses to chemical stimuli during sleep
G. Bowes 207

Fetal behaviour and the cardiovascular system
G. H. A. Visser 215

Brain mechanisms, hypoxia and fetal breathing
D. Walker 225

Growth of the fetal lung
G. C. Liggins 237

Perinatal development of laryngeal function
R. Harding 249

Fetal physiology and behaviour: changing direction 1954–1983
G. S. Dawes 259

Fetal oxygen consumption, umbilical circulation and electrocortical activity transitions in fetal lambs
A. M. Walker, J. Fleming, J. Smolich, R. Stunden, R. Horne & J. Maloney 267

Regulation of cerebral blood flow in the fetus
J. Bissonnette & A. R. Itohimer 275

Control of the pulmonary circulation in the perinatal period
M. A. Heymann 281

Developmental aspects of the hypothalamic-pituitary-adrenal axis
E. Marelyn Wintour 291

Functional maturation of the neuroendocrine system in the perinatal period: studies of the somatotropic axis in the ovine fetus
P. D. Gluckman 301

Number 4, August 1984

Lung development in the nephrectomized ovine fetus
C. G. Plopper, J. Z. Kendall, L. Saldana-Gautier, J. Arias-Bravo, M. Rivera-Alcina, S. Szmyd & P. D. Webb 313

Heart rate pattern during respiratory pauses in normal infants during sleep
G. G. Haddad, A. R. Bazzy, S. L. Chang & R. B. Mellins 329

Behavioural state influences the cardiovascular response to haemorrhage in lambs
J. E. Fewell, B. J. Williams & D. E. Hill 339

Effects of beta-adrenergic blockade on blood flow distribution during hypoxaemia in fetal sheep
D. J. Court, J. T. Parer, B. S. B. Block & A. J. Llanos 349

Fetal CO_2 kinetics
L. C. P. Van Veen, W. W. Hay, Jr., F. C. Battaglia & G. Meschia 359

Fetal breathing movements and lung maturation in the congenitally abnormal human fetus
J. C. Dornan, J. W. K. Ritchie & C. Meban 367

Acute embolization of the uteroplacental circulation: uterine blood flow and plancental CO diffusing capacity
J. W. Boyle, F. K. Lotgering & L. D. Longo 377

Number 5, October 1984

Effect of hypoxia on the excitability of two cranial reflexes in unanaesthetized fetal sheep
D. W. Walker & R. Harding 387

Sleep does not affect the cardiovascular response to alveolar hypoxia in lambs
J. E. Fewell, B. J. Williams & D. E. Hill 401

The blood supply to the abdominal organs of the fetal guinea pig
A. M. Carter 407

Lack of correlation of severity of lung disease with the phosphatidylcholine concentration in fetal lung fluid from premature lambs at 133–136 days gestational age
A. Jobe, H. Jacobs & M. Ikegami 417

Pre-parturitional changes in serum prolactin, placental lactogen, growth hormone, progesterone, and corticosterone in the C3H/HeN mouse
M. J. Soares & F. Talamantes 423

Nutrient and waste product concentration differences in upper and lower body arteries of fetal sheep
Valerie Charlton & M. Johengen 431

Book Review

G. Rylance, Principles of Paediatric Pharmacology, G. M. Maxwell 439

Number 6, December 1984

Effects of asphyxia at birth on postnatal glucose regulation in the rat
R. D. Jansen, M. K. Hayden & E. S. Ogata 441

Cardiac output and regional blood flows during hypoxemia in unanesthetized newborn lambs
D. J. Fisher 461

Effects of naloxone on the breathing, electrocortical heart rate, glucose and cortisol responses to hypoxia in the sheep fetus
S. L. Adamson, J. E. Patrick & J. R. G. Challis 473

Changing responsiveness to growth hormone releasing factor in the perinatal lamb
P. D. Gluckman 485

Transfer of fatty acid across the cat placenta
D. Hull & M. C. Elphick 495

Studies on the growth of the fetal guinea pig. The effects of ligation of the uterine artery on organ growth and development
H. N. Lafeber, T. P. Rolph & C. T. Jones 509

Studies on the growth of the fetal guinea pig. The effects of uterine artery ligation on fetal hormone concentrations
C. T. Jones, N. H. Lafeber & M. M. Roebuck 517
